

Lightning Strike Counter

Lightning Strike Counters register direct lightning events. They have a long life and do not require a battery or external power.

A sensitive response trigger current of only 500A can register very high lightning strikes up to 150kA 8/20µs. **Lightning Strike Counters** utilise a 6 digit mechanical count display and are IP67 rated for outdoor use.

Suitable for use with 8mm dia and 25 x 3mm conductors.
